SUMMARY

Data-driven acquisition marketer who manages and optimizes paid campaigns with over $1M in monthly ad spend across multiple business verticals on Google Ads and Microsoft Ads. I monitor and analyze KPIs, analyze performance to find growth opportunities, and work daily with Product, Content, Design, BD and BI to turn insights into action. My background in communications and digital content adds a creative, user-focused lens to growth, and Python, Tableau and a technology-focused BSc honors degree support the analytical side. Looking to own end-to-end growth and experimentation for a consumer product.
